Results Format Preferred: DISK

I would like to have a standard **and INTERFERENCE** search performed as indicated below

SEQ ID NO. 3 is 2214 nucleotides in length.

If possible, please search using nucleotides 1000-1092 of SEQ ID NO. 3 AND limit the size of the hits to nothing larger than 50 nucleotides.

To be clear, I need to search for any oligonucleotides up to 50 nucleotides in length wherein the oligonucleotide binds to the region of nucleotides 1000-1092 of SEQ ID NO: 3.

Thanks,
Eric
